

Analyst's Notebook® version 8 (i2)

Analyst's Notebook 8 by i2 allows law enforcement the ability to visualize and analyze large amounts of investigative data. This introductory course lays the foundations of the software capabilities and gives the user the skills to create basic link and timeline charts, allowing investigators and analysts to bring clarity to complex investigations. This five-day training course will also show the user how the software can help in revealing patterns and hidden connections in the available investigative information. Students will also learn how to create useful charts for presenting information to others in an easily understandable form.
